HOBBIES

- Chess

ABOUT ME

After my experiences in game development, I turned to the field of web development and improved my skills by learning fundamental technologies such as HTML, CSS, and JavaScript. I had the opportunity to apply my creative approach and problem-solving skills from the gaming world to my web projects. Currently, I am working in the web field, continuing to enhance user experience and create aesthetically appealing designs.

WORK HISTORY

FRONT END DEVELOPER INTERN

PurpleBox, Inc. / Jul 2024 - Sep 2024

- I had the opportunity to use powerful services like AWS Cognito and IAM. With these services, we ensured that users have a secure experience. After registering, users can easily log in, log out, and change their passwords. The password reset process is carried out with a verification code sent to the user via email. This site allows users to add their favorite products to the cart and securely complete the payment processes. With all these features, we provided users with a seamless shopping experience.

GAME DEVELOPER INTERN

El-Capitan Game / Oct 2023 - Feb 2024

- I gained valuable experience in mobile game development by working on various projects, which enhanced my understanding of game mechanics and user experience. I focused on integrating advertising into games and optimizing revenue while improving user interaction.

WEB DEVELOPER INTERN

BSK Information Technologies - Jul 2022 - Dec 2022

- I gained valuable experience designing websites and using JavaScript to add interactive elements. My designs focus on user-friendly interfaces that enhance both functionality and aesthetics.
